## DETAILED ACTION

1. Claims 1-13 are presented for examination.
2. Claims 1-13 are allowed.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
  - a. Hagiwara U.S. Patent No. 6,774,968 discloses the injection hole, the data signal driver, and the scanning signal driver disposed on different peripherals along different sides of the array substrate, [fig. 1].
  - b. Tobita U.S. Patent Application Publication No. 204/0246246 discloses an image data write related circuit comprising a gate line drive circuit for sequentially driving the gate lines in display panel, a data line drive circuit for generating and transmitting a pixel data signal for a pixel in display panel, where the image data write related circuit disposed around the display panel as a U shape, [fig. 1].

The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention distinguishes over the prior art for the following reasons. The claims are allowable over the prior art of record because none of the references, either alone or in combination, discloses or renders obvious a display panel with an integrated driver circuit comprising:

- a liquid crystal injection hole disposed on the fourth peripheral area of the array substrate.

Art Unit: 2871

- a first driver circuit disposed on the adjacent edge of the first peripheral area and the second peripheral area of the array substrate.
- a second driver circuit disposed on the third peripheral of the array substrate and part of the first peripheral area where the first driver circuit is not disposed on.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
